Environmental Policy

We believe that businesses are responsible for achieving good environmental practice and operating in a sustainable manner.

We are therefore committed to reducing our environmental impact and continually improving our environmental performance as an integral and fundamental part of our business strategy and operating methods.

It is our priority to encourage our customers, suppliers and all business associates to do the same. Not only is this sound commercial business sense for all; it is also a matter of delivering on our duty of care towards future generations.

Our policy is to -

- Support and comply with, or exceed the requirements of current environmental legislation and codes of practice.
- Minimise our waste, and then reuse or recycle as much of it as possible.
- Minimise energy and water usage in our buildings, vehicles and processes, in order to conserve supplies, and minimise our consumption of natural resources, especially where they are non renewable.
- Operate and maintain company vehicles with due regard to environmental issues as far as reasonably practical, and encourage the use of alternative means of transport.
- Apply the principles of continual improvement, in respect of air, water, noise, and light pollution from our premises, and reduce any impacts from our operations on the environment and local community.
- As far as is reasonably possible, purchase products and services that do the least damage to the environment, and encourage others to do the same.
- Assess the environmental impact of any new processes or products we intend to introduce in advance.
- Ensure that all employees understand our environmental policy and conform to the highest standards when required.
- Address any complaints about any breach of our environmental policy promptly and to the satisfaction of all concerned.
- Review our environmental policy annually, in consultation with staff, associates and customers.
